

Quality is Behind the Diamond®

**Amerex Corporation**

Manufactured to  
ANSI / UL Standards  
AS & NZ Standards  
ISO-9001 / ISO-14001 Certified

RECHARGE AGENTS

Part Number	Unit	Description	
550	50lb Pail	ABE Recharge Powder - MAP 95%	
512	50lb Pail	BE Recharge Powder - MAP 90%	
515	50lb Pail	Purple K Recharge Powder - fluidised and siliconised potassium bicarbonate	
545	50lb Pail	Class D - Recharge powder sodium chloride based for alloy, magnesium fires	
548	50lb Pail	Class D - Recharge powder copper based for lithium fires	
530	6ltr	Wet Chemical - Special potassium acetate based, low PH.	

Amerex powders and Agents are UL (Underwriters Laboratory) tested, separately from the extinguisher. Amerex guarantees that this % of active ingredients will be in each extinguisher and recharge pack.

**IMPORTANT** - Do not mix ABE and BE powders - the reaction creates pressure within the cylinder which is increased with heat and can result in the extinguisher exploding.
